

Kevin Gomez

Full Stack Software Developer

📍 Los Angeles, CA • 📞 (805) 246-7316 • ✉ kevin@kevingomez.dev
🌐 linkedin.com/in/kkgomez2 • 🐙 github.com/kkgomez2 • 📺 kevingomez.dev

Full-stack, front-end focused web developer looking to bring my 7 years of professional experience and passion for great UX to energize teams and build smart solutions.

Experience

Personal Projects

Nov 2020 – Present

- Designed and wrote kevingomez.dev, software developer portfolio, with React.js, TypeScript, Vite, animated with Framer Motion and Anime.js, deployed with Vercel.
- Deployed React.js based movie search app, trending-movies-db.vercel.app, querying API to display movies by popularity, search, and record queries to an Appwrite database.
- Designed and wrote kevinkgomez.com, my acting portfolio, using Next.js, Tailwind, Vercel.

Seismic Software - Chicago, IL

Senior Software Engineer

Aug 2022 – Jun 2023

- Led a React-based browser extension for end-user enterprise app integrations:
 - Architected the communication between separate instances of the app.
 - Managed backlog, story grooming/prioritization and guided the team through the agile process.
- Designed and architected a system that allowed back-end developers to generate and deploy a fully functional front-end.
- Collaborated with business stakeholders from product and design teams
- Mentored/Onboarded new developers to aid in their self-sufficiency.
- Led i18n localization effort with extensive vetting and design changes.

Software Engineer II

May 2018 – Aug 2022

- Contributed to full stack and architecture of a web-based video conferencing system, utilizing Ember.js, WebRTC, and OpenTok.
- Revamped legacy event-based system for writing to CRM, Salesforce and Dynamics, mediating stakeholder needs and system constraints.
- Took ownership of documentation during company acquisition and team shifting.

SAVO Group - Chicago, IL

Software Developer I & II

Aug 2016 – May 2018

- Managed deployment risk strategy with automated pipeline tests, Selenium for multiple browsers, staged environments, and easy rollback.
- Contributed to system that injected Ember.js web pages into a .NET monolith to replace pages individually.
- Adapted to working on 10+ year old codebases and the newest JavaScript frameworks in an Agile environment with high profile client negotiation.
- Thrived in a fail-fast, learn-quick environment, while keeping people positive along the way.

Education

University of Illinois at Urbana-Champaign
